

College of Engineering, Construction & Living Sciences Bachelor of Information Technology ID511001: Programming 2

Level 5, Credits 15

Project 1 (C# Console App): Learner Gradebook

Assessment Overview

In this assessment, you will design & develop a learner gradebook Console App using C#.

Learning Outcomes

At the successful completion of this course, learners will be able to:

- 1. Build interactive, event-driven GUI applications using pre-built components.
- $2. \ \ Declare \ \& \ implement \ user-defined \ classes \ using \ encapsulation, \ inheritance \ \& \ polymorphism.$

Assessments

Assessment	Weighting	Due Date	Learning Outcomes
Project 1 (C# Console App): Learner Gradebook	25%	26-04-2023 (Wednesday at 4.59 PM)	1 & 2
Project 2 (C# Windows Forms App): Pong	35%	14-06-2023 (Wednesday at 4.59 PM)	1 & 2
Theory Examination	30%	21-06-2023 (Wednesday at 4.45 PM)	1 & 2
Classroom Tasks	10%	07-06-2023 (Wednesday at 4.59 PM)	1 & 2

Conditions of Assessment

You will complete this assessment during your learner-managed time. However, there will be time during class to discuss the requirements & your progress on this assessment. This assessment will need to be completed by Wednesday, 26 April 2022 at 4.59 PM.

Pass Criteria

This assessment is criterion-referenced (CRA) with a cumulative pass mark of 50% over all assessments in ID511001: Programming 2.

Authenticity

All parts of your submitted assessment **must** be completely your work. If you use code snippets from **GitHub**, **StackOverflow** or other online resources, you **must** reference it appropriately using **APA 7th edition**. Provide your references in the **README.md** file in your repository. Failure to do this will result in a mark of **zero** for this assessment.

Policy on Submissions, Extensions, Resubmissions & Resits

The school's process concerning submissions, extensions, resubmissions & resits complies with **Te Pūkenga** policies. Learners can view policies on the **Te Pūkenga** website located at https://www.op.ac.nz/about-us/governance-and-management/policies.

Submission

You **must** submit all app files via **GitHub Classroom**. Here is the URL to the repository you will use for your submission – https://classroom.github.com/a/eFe1Oh97. Create a .gitignore & add the ignored files in this resource - https://raw.githubusercontent.com/github/gitignore/main/VisualStudio.gitignore. The latest app files in the **master** or **main** branch will be used to mark against the **Functionality** criterion. Please test before you submit. Partial marks will **not** be given for incomplete functionality. Late submissions will incur a **10% penalty per day**, rolling over at **5:00 PM**.

Extensions

Familiarise yourself with the assessment due date. Contact the course lecturer before the due date if you need an extension. If you require more than a week's extension, you will need to provide a medical certificate or support letter from your manager.

Resubmissions

Learners may be requested to resubmit an assessment following a rework of part/s of the original assessment. Resubmissions are to be completed within a negotiable short time frame & usually **must** be completed within the timing of the course to which the assessment relates. Resubmissions will be available to learners who have made a genuine attempt at the first assessment opportunity & achieved a **D grade (40-49%)**. The maximum grade awarded for resubmission will be **C-**.

Resits

Resits & reassessments are not applicable in ID511001: Programming 2.

Instructions

You will need to submit an app & documentation that meet the following requirements:

Functionality - Learning Outcomes 1 & 2 (40%)

- The app must open without code or file structure modification in Visual Studio.
- Read a text file called **learners.txt** which contains information about five learners. This information includes **id**, **first name**, **last name**, three **ID510001**: **Programming 1 assessment marks** & three **ID511001**: **Programming 2 assessment marks**. **Note**: **learners.txt must** be located in the **bin/Debug** folder.
- The learners' information is stored in a **List** of **Learner** objects. A **Learner** object **must** have the following fields:
 - -id
 - firstName
 - lastName
 - AssessmentMarks object called prog1AssessmentMarks
 - AssessmentMarks object called prog2AssessmentMarks

Note: A Learner has no behaviours.

- An **AssessmentMarks** object **must** have the following fields:
 - A List of int called assessmentMarks
- An **AssessmentMarks** object has several behaviours such as getting all marks, all grades, highest mark(s), lowest mark(s), fail mark(s), average mark and average grade.
- A grade is calculated using the following grade table:

Grade	Mark Range
A+	90-100
A	85-89
A-	80-84
B+	75-79
В	70-74
В-	65-69
C+	60-64
C	55-59
C-	50-54
D	40-49
E	0-39

- The app **must** display the following menu options:
 - 1. Display all marks
 - 2. Display all grades

- 3. Display highest, lowest and fail marks
- 4. Display average marks
- 5. Display average grades
- 6. Add a learner
- 7. Remove a learner
- -0. Exit

Note: You will need to create individual methods to achieve this functionality. Also, the app **must** be able to handle invalid user input. If the user enters an invalid option, an error message **must** be displayed.

```
Select C:\Users\graysono\Desktop\learmer-gradebook-model-answer\learmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answer\earmer-gradebook-model-answ
```

• When the user selects **1. Display all marks**, the app **must** display all marks for all learners. The marks **must** be displayed as follows:

```
🖭 C:\Users\graysono\Desktop\learner-gradebook-model-answer\learner-gradebook-model-answer\bin\Debug\net6.0\learner-gradebook-model-answer.exe
   Display all marks
2. Display all grades
3. Display highest, lowest and fail marks
4. Display average marks
5. Display average grades
 . Add a learner
   Remove a learner
   Exit
Enter your choice: 1
All marks:
Learner ID: 1
Learner Name: John Doe
ID510001: Programming 1 marks: 45, 50, 60
ID511001: Programming 2 marks: 70, 65, 90
Learner ID: 2
Learner Name: Jane Doe
ID510001: Programming 1 marks: 45, 35, 45
ID511001: Programming 2 marks: 75, 65, 100
Enter your choice:
```

• When the user selects **2. Display all grades**, the app **must** display all grades for all learners. The grades **must** be displayed as follows:

```
C\Users\graysono\Desktop\learner-gradebook-model-answer\learner-gradebook-model-answer\bin\Debug\net6.0\learner-gradebook-model-answer.exe

1. Display all marks
2. Display all grades
3. Display highest, lowest and fail marks
4. Display average marks
5. Display average grades
6. Add a learner
7. Remove a learner
8. Exit

Enter your choice: 2

All grades:

Learner ID: 1

Learner Name: John Doe
ID510001: Programming 1 grades: D, C-, C+
ID511001: Programming 2 grades: B, B-, A+

Learner Name: Jane Doe
ID510001: Programming 1 grades: D, E, D
ID511001: Programming 2 grades: B+, B-, A+

Enter your choice:
```

• When the user selects **3. Display highest, lowest and fail marks**, the app **must** display the highest, lowest and fail marks for all learners. The marks **must** be displayed as follows:

```
C.\Users\graysono\Desktop\learner-gradebook-model-answer\learner-gradebook-model-answer\sin\Debug\net6.0\learner-gradebook-model-answer.exe

1. Display all marks
2. Display all grades
3. Display highest, lowest and fail marks
4. Display average marks
5. Display average grades
6. Add a learner
7. Remove a learner
8. Exit

Enter your choice: 3

Highest, lowest and fail marks:

Learner ID: 1

Learner Name: John Doe

ID510001: Programming 1 highest marks: 60

ID510001: Programming 1 lowest marks: No lowest marks
ID510001: Programming 2 highest marks: 90

ID511001: Programming 2 lowest marks: No lowest marks
ID511001: Programming 2 fail marks: No fail marks

Learner ID: 2

Learner Name: Jane Doe

ID510001: Programming 1 highest marks: 45, 45

ID510001: Programming 1 highest marks: No lowest marks
ID510001: Programming 1 fail marks: No lowest marks
ID510001: Programming 1 highest marks: No lowest marks
ID510001: Programming 2 highest marks: No lowest marks
ID510001: Programming 1 highest marks: No lowest marks
ID510001: Programming 2 highest marks: No lowest marks
ID510001: Programming 2 lowest marks: No lowest marks
ID510001: Programming 2 highest marks: 100
ID511001: Programming 2 lowest marks: No lowest marks
```

Note: If there is no fail mark(s), the **Fail marks: must** be displayed as **No fail marks**. If there is no lowest mark(s), the **Lowest marks: must** be displayed as **No lowest marks**. If there is no highest mark(s), the **Highest marks: must** be displayed as **No highest marks**.

• When the user selects **4. Display average marks**, the app **must** display the average marks for all learners. The marks **must** be displayed as follows:

```
C:\Users\graysono\Desktop\learner-gradebook-model-answer\learner-gradebook-model-answer\bin\Debug\net6.0\learner-gradebook-model-answer.exe

1. Display all marks
2. Display all grades
3. Display highest, lowest and fail marks
4. Display average marks
5. Display average grades
6. Add a learner
7. Remove a learner
9. Exit

Enter your choice: 4

Average marks:

Learner ID: 1

Learner Name: John Doe

ID510001: Programming 1 average mark: 51.67

ID511001: Programming 2 average mark: 75

Learner Name: Jane Doe

ID510001: Programming 1 average mark: 41.67

ID511001: Programming 2 average mark: 80

Enter your choice:
```

• When the user selects **5. Display average grades**, the app **must** display the average grades for all learners. The grades **must** be displayed as follows:

```
C:\Users\graysono\Desktop\learner-gradebook-model-answer\learner-gradebook-model-answer\bin\Debug\net6.0\learner-gradebook-model-answer.exe

1. Display all marks
2. Display all grades
3. Display highest, lowest and fail marks
4. Display average marks
5. Display average grades
6. Add a learner
7. Remove a learner
8. Exit

Enter your choice: 5

Average grades:

Learner ID: 1

Learner Name: John Doe

ID510001: Programming 1 average grade: C-
ID511001: Programming 2 average grade: B+

Learner ID: 2

Learner Name: Jane Doe

ID510001: Programming 1 average grade: A-

Enter your choice:
```

- When the user selects 6. Add a learner, the app must prompt the user to enter the following information:
 - First name
 - Last name
 - ID510001: Programming 1 assessment mark 1
 - ID510001: Programming 1 assessment mark 2
 - ID510001: Programming 1 assessment mark 3
 - ID511001: Programming 2 assessment mark 1
 - ID511001: Programming 2 assessment mark 2
 - ID511001: Programming 2 assessment mark 3

Note: An assessment mark must be between 0 and 100. If an assessment mark is invalid, an error message must be displayed. Also, the id of the learner must be generated automatically. However, the id must be unique.

```
Louisplay all marks
1. Display all marks
2. Display all grades
3. Display highest, lowest and fail marks
4. Display average marks
5. Display average marks
5. Display average marks
6. Add a learner
7. Remove a learner
9. Exit
Enter your choice: 6

Add learner:
Enter learner's first name: Grayson
Enter learner's first name: Orr
Enter 10510001: Programming 1 assessment 1 marks: 50
Enter 10510001: Programming 1 assessment 2 marks: 60
Enter 10510001: Programming 1 assessment 3 marks: 75
Enter 10510001: Programming 2 assessment 1 marks: 55
Enter 10510001: Programming 2 assessment 1 marks: 56
Enter 10510001: Programming 2 assessment 3 marks: 75
Enter 10510001: Programming 2 assessment 3 marks: 75
Enter 10510001: Programming 2 assessment 3 marks: 75
Enter 10510001: Programming 2 assessment 3 marks: 10
Learner With the id: (3) was added

Enter your choice: 1
All marks:

Enter your choice:
```

- When the user selects **0. Exit**, the app **must** exit.
- 20 unit tests using MSTest which verify the functionality.

Code Elegance - Learning Outcomes 1 & 2 (45%)

- Adhere to the four principles of **OO**, i.e., encapsulation, abstraction, inheritance & polymorphism.
- Use of intermediate variables, constants & try-catch blocks.
- Idiomatic use of control flow, data structures & in-built functions.
- Efficient algorithmic approach.
- Sufficient modularity.
- Each method & class **must** have a header comment located immediately before its declaration.
- In-line comments where required.
- App files, i.e., .cs files are formatted.
- No dead or unused code.

Documentation & Git Usage - Learning Outcomes 1 & 2 (15%)

- Provide the following in your repository **README.md** file:
 - The app's class diagram created in **Visual Studio**.
 - How to run the unit tests.
 - Known bugs if applicable.
- Commit at least 20 times per week.
- Commit messages must reflect the context of each functional requirement change.
